

Nomenclature

Symbol This is a rather long and ridiculous description designed to test the alignment of this said description with that of the associated symbol.

T This is a math nomenclature example.

ρ This is an `\ensuremath` check.

Acronyms (A SubNomenclature)

TCP Transmissions Control Protocol

FEM Finite Element Method

Ω A post-SubNomenclature entry. *The above rule is not automatically generated.*
This isn't a particularly useful feature and should be avoided for clarity and is only supported in case an entry is accidentally added after a SubNomenclature.

Symbol Post-SubNomenclature `\WidestSymbol` test.
